

Dr. William Hunter. late a
practising physician & Surgeon —

I have known John Brownlow for some years
past, I have examined the wounds on his head
which are numerous & must have been very
severe, I am conversant with his neighbors
and it is a general & received opinion
^{among them} that at times the said Brownlow is entirely
unable for any duties, owing to the situation
of his mind, which ~~now~~ no doubt arises from
his faculties being impaired by the wounds on
his head — and from all appearances ~~of~~
being his present state his mental disorder
must increase with age. — From my
knowledge of Brownlow's Character I have
no doubt of the truth of his statement —
Sworn & Subscribed before me 11th Feb. 1873

Wm. Hunter
John Prince Jew.

I lived a neighbor to John Brownlow at the
time he went against the Corps as mentioned
in the foregoing affidavit of the said Brownlow
he went out as he states, I was not with him
in the battle nor did I see him before
the fall after the battle, at which
time he had not recovered of his wounds
